We create products for great teachers.

McGraw-Hill recognizes that two great teachers can approach a subject in radically different ways and they can both get amazing results.

At McGraw-Hill, we make instructional delivery tools for great teachers. All of them. That means we don't just make textbooks or workbooks or mobile games and apps or online portals or interactive whiteboard tools. We take the quality content that great teachers have come to depend on and deliver it in all of these formats.

McGraw-Hill understands how great teachers teach in the classroom. What they really want is trusted content. Then they want to be able to choose the delivery methods that work best for them—not one-size-fits-all. When you start with great content and then give a full range of great tools, you end up making great teachers look even greater.

McGraw-Hill is for great teachers.

The same research-validated, standards-based curriculum, delivered in a variety of ways to fit the needs of any classroom.

Math Triumphs

This RtI Level 3 program helps students, who are two or more years behind in mathematics, master the foundational skills and concepts from prior grades that are prerequisites to the current grade level.

- Provides step-by-step instruction and practice to ensure success
- Monitors students' progress through print and electronic resources
- Provides intensive (RtI Tier 3) intervention for students
- Supports tutoring, pull-out, after school, and summer school programs

Resources

- **Teacher Editions** contain all that is needed to teach intervention students, including features such as Data-Driven Instructional Guides, Planning Assistance, Chapter Overviews, Home Connections, Manipulative Instruction, ELL Strategies, and Math Coach Notes.
- **Assessment Masters** help identify specific areas of student need, suggest appropriate placement, and determine student readiness for transitioning back to on-level curriculum.
- **Chapter Resource Masters**, located in the back of each Teacher Edition, provide additional practice and reteaching opportunities for each lesson.
- **TeacherWorks™ Plus CD-ROM/DVD** contains the Teacher Edition, Assessment Masters, and editable Chapter Resource Masters, permitting teachers to customize their lessons plans and content for the intervention classroom.
- **ExamView® Assessment Suite CD-ROM** contains diagnostic, formative, and summative assessments.

Glencoe Algebra 2

Today's Program for Tomorrow's Leaders

Prepare your students for 21st century success with...

- Seamlessly integrated print, digital, and interactive content that connects with students when and how they want.
- Complete alignment with the Common Core State Standards.
- Support and resources for tailoring instruction to all levels of learners.
- Built-in, frequent assessments that monitor student understanding and progress to ensure all students master concepts.

Prepare students to be critical thinkers and problem solvers.

- **Dynamic print, digital, and interactive resources** that work together seamlessly to engage learners, create personalized learning experiences, and ensure mastery of the Common Core curriculum
- **Trusted content** that leverages decades of research and experience to make math relevant to today's youth, present concepts clearly, and provide practice of skills and problem solving
- **Built-in online assessments and support for differentiated instruction** to help teachers assess each student's skill level and tailor instruction accordingly
- **Resources online anytime, anywhere** for planning, data management and reporting, professional development, and parent communication to help teachers plan and prepare appropriate lessons, assess student progress, and provide differentiated instruction

Glencoe Algebra 1, Glencoe Geometry, and Glencoe Algebra 2 are designed for today's classrooms, connecting teachers with a comprehensive set of tools to help every student succeed.

We create products for great teachers.

McGraw-Hill recognizes that great teachers can approach a subject in radically different ways, and *still* get amazing results.

At McGraw-Hill, we make instructional delivery tools for great teachers. All of them. That means that we don't just make textbooks or workbooks or mobile games and apps or online portals or interactive whiteboard tools. We take the quality content that great teachers have come to depend on and deliver it in all of these formats.

You see, McGraw-Hill understands how great teachers teach. What they really want is trusted content. Then they want to be able to choose whatever delivery methods work best for them, not one-size-fits-all. When you start with great content and then give a full range of great tools, you end up making great teachers look even greater.

Are you tired of limits? Would you rather customize your curriculum? Are you ready for an all-digital approach? If so, **CINCH® Learning** is your solution!

- **Choose** ANY lesson from our complete grades 6-12 content bank, including *Algebra* and *Geometry*. Review concepts students have already had, or challenge them with greater depth from a higher grade
- **Customize** lessons with interactive resources such as videos and animations
- **Insert** in your favorite content from other sources and manage it all from one place (Students see only the lessons and assignments that you choose.)
- **View** content on mobile devices—anywhere, anytime

Glencoe Precalculus

Today's Program for Tomorrow's Leaders

Glencoe Precalculus provides a strong foundation for student success in advanced mathematics.

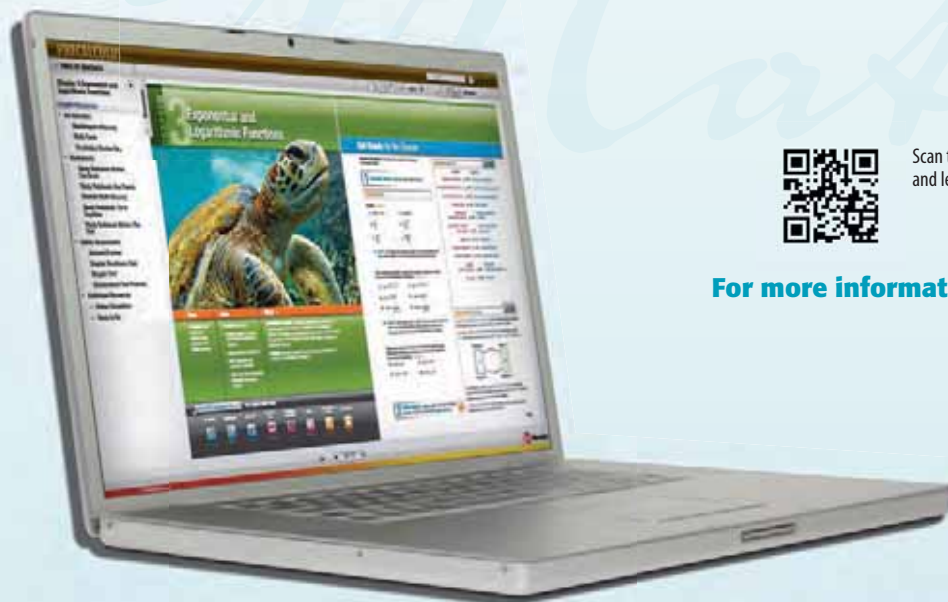

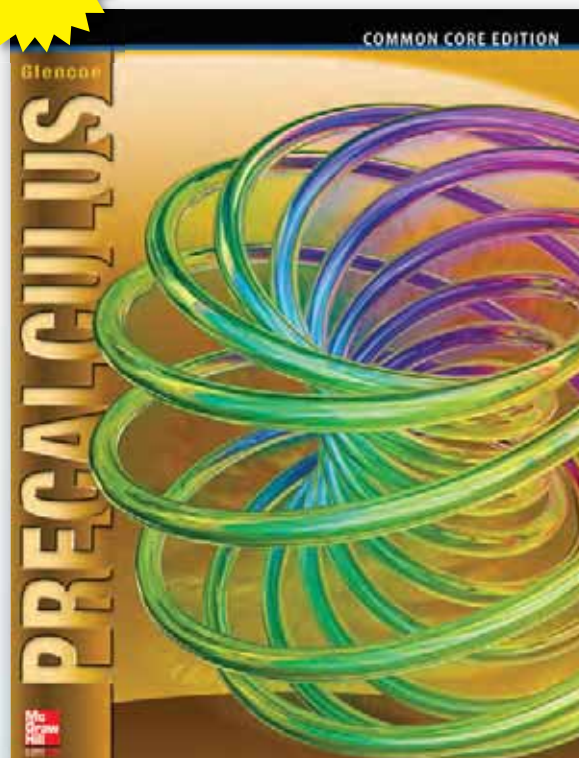

- Creates a dynamic learning experience for the 21st century learner with print, digital, and interactive resources
- Features in-depth lessons, tiered resources, and a variety of teaching strategies to assist teachers in meeting the needs of all learners
- Provides real-world applications presenting concepts and skills in ways that connect with students and provide real-world relevance
- Includes built-in, ongoing assessments that ensure all students master concepts
- Offers embedded graphing technology opportunities to extend concepts taught in every chapter

EMPower Math

Now the exclusive distributors of *EMPower Math*!

EMPower (Extending Mathematical Power) uses an innovative research-based approach to the teaching and learning of mathematics. It offers a truly different way to learn math for nontraditional students enrolled in adult basic education, pre-GED, GED®, and transitional courses to college, as well as students in alternative high schools, workplace settings, or corrections programs.

- Fosters mathematical reasoning included in the Common Core State Standards and the NCTM's Principles and Standards for School Mathematics
- Engages learners with student-centered activities relevant to everyday life
- Works well alongside Contemporary mathematics products such as *Number Power* and *Math Problem Solver*
- Prepares students for a deeper level of math proficiency necessary to successfully handle everyday problems as well as mathematics tests like the GED® or college placement exams
- Embeds teacher support and promotes a learning community in which students communicate ideas orally—and in writing—and discover multiple strategies for solving problems
- Professional Development available through the Technical Education Research Centers, Inc. (TERC) author team (EMPower.terc.edu)

Messersmith Algebra Series

Messersmith

The Messersmith series presents the content in bite-size pieces, focusing on learning mathematical concepts and explaining the “why” behind those concepts. For students, learning mathematics is more than the memorization of concepts and formulas; it is also the journey of learning how to solve problems.

Dugopolski Algebra Series

Dugopolski

The goal of the successful Dugopolski series is to explain mathematical concepts to students in a language they can understand. In this book, students and teachers find short, precise explanations of terms and concepts written in understandable language. The author uses concrete analogies to relate math to everyday experiences.
