

Math Connects

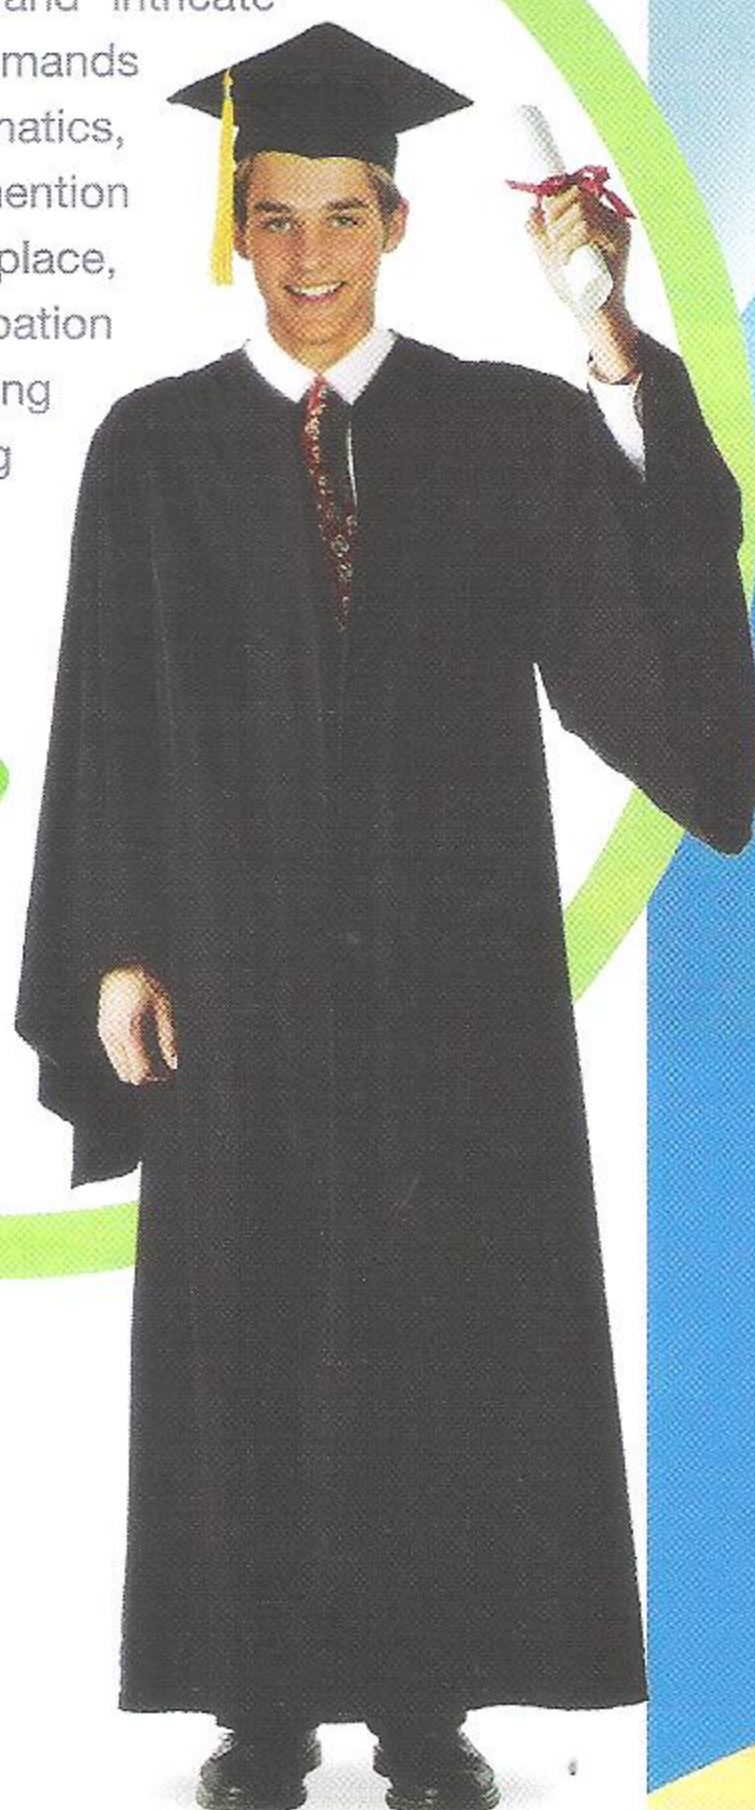

Grades K-5

Macmillan/McGraw-Hill Math Connects provides opportunities for students to build their understanding of mathematical concepts and ample practice to master important skills. Most importantly, all concepts are taught through and practiced within a strong problem-solving environment insuring that students become life-long problem solvers.

“The only way to guarantee students can handle the critical, subtle, and intricate 21st Century reading demands of literature, history, mathematics, and science — not to mention those of technology, the workplace, and civic and social participation — is to build high-quality teaching upon high-quality teaching all the way from the wide-eyed wonder of the ABCs through the increasingly rigorous expectations of high school graduation.”

Timothy Shanahan
Professor of Urban Education
University of Illinois at Chicago

Cynthia Shanahan
Director of Teacher Education
University of Illinois at Chicago

Math Connects For ALL Students

Connects content seamlessly
between grade levels

Connects to the NCTM Focal Points
and state standards

Connects concepts, skills,
and problem solving

Connects to all students with
differentiated instruction

Connects to an NSF approach
with IMPACT Mathematics

Connects all students to RTI
(Response to Intervention)
with Math Triumphs
