LearnSmart
Give students the tools they need—when they need them

The LearnSmart interactive, adaptive study tool assesses a student’s skill and knowledge levels to track which topics in the course have been mastered and which require further practice. Based on the student’s demonstrated skill and confidence, LearnSmart dynamically adjusts the learning content to match the student’s progress. Every student experiences LearnSmart differently—the sequence of practice questions is presented to each student uniquely, depending on how much course content has been mastered.

- Allows students to personalize their learning by judging how well they know U.S. History content and then answering questions. The more confident students are about the information and the more questions they answer correctly, the more points they can earn. If they miss a question, points are taken away
- Pinpoints students’ knowledge gaps intelligently—adapts questions to what they need to learn
- Includes optimal learning paths for students so they spend less time on what is known and more time on what they need to know
- Engages and motivates students with a friendly, familiar gaming format
- Proven to increase students’ retention of material and improve student performance and grades
- Access online with the LearnSmart mobile app available for the iPhone®, iPod touch®, and iPad®

**Pyramid Fold**

1. Fold a sheet of paper into a taco, forming a square. Cut off the leftover piece.
2. Fold the triangle in half. Unfold. The folds will form an X dividing four equal sections.
3. Cut up one fold line and stop at the middle. Draw an X on one tab and label the other three.
4. Fold the X flap under the other flap and glue together. This makes a three-sided pyramid.

Label front sections and write information, notes, thoughts, and questions inside the pyramid on the back of the appropriate tab.

Record data inside the pyramid. Use to make mobiles and dioramas.

Glue four pyramids together to form a diorama showing four parts or stages.
